Mrs Joëlle Aflalo

 photo Joelle site Hulya.jpg

Mrs Aflalo is one of the founder members of the Matanel Foundation and is a member of the Board of Patrons of the CER.

Post

Dear Friends,

You are all my dear friends (and forgive me I am unable to name each of the important guests of this evening, and on top of it in good order, without doing huge mistakes.)

So, you are my friends and my family. Being with friends and family allow me to say my truth.

I am a simple Jewish girl coming from Fez (Morocco) where Judaism was full of joy, full of traditions, full of love, tolerant, where women were sitting near their husband,

where we were helping each other without checking how much observant the other was. Hospitality, family, warm dialog, education allowing all kind of lectures.

What happened to that Judaism?

Judaism which unites instead of divide. A warm and amicable Judaism where we can receive at home like we do in Luxembourg with my husband. Where we exchange ideas without rejecting.

Europe is facing either assimilation, either departure out of fear.

The Judaism of tomorrow relies on actual Rabbis or Rabbis to be (future Rabbis); they are the tool of transmission of Judaism.

What Judaism will be transmitted? Who will be the Rabbis of tomorrow?

They will be (and they already are) confronted to questions of society. We must help them write articles, speak in public, provide support or give answers to their congregants. All that with the collaboration of Dayanim on how to treat problems they are confronted to. Dayanim of Europe or Dayanim having the knowledge of Europe. The sphere of chief/ big/ great rabbis is too far from young rabbis and – sorry to say – it is something purely or mainly political.

Politics was the passion of the last decade for Rabbanim.

But, but, but...

During those two days of 28th Convention of CER, I watched, I listened, I walked through and I got the smell of success.

No doubt, I am comforted that CER is doing a good political job and has some success in the area or arena and with the help of the Almighty (the boss) CER will continue its path for causes which we have consensus on.

We are all for maintaining Brit Mila (it was a big/ small issue with Meziza and I must congratulate Pinchas Goldschmidt and the Dayanim to have taken position very quickly).

On that matter, we are all for allowing Chehita.

We are all for peace.

We are all united for big common causes, but the devil is in the details in small causes. The work to be done for maintaining (I am not speaking about developing) Judaism in Europe is tremendous.

Day to day, work on the fields is accomplished by most of you and you know what you are facing.

Matanel Foundation has understood it and being a small foundation. It has decided to focus on what I call “start up”: combination of good manager/ good ideas/ warm Judaism/ ethic and factor of success.

When a battle is won, it has several fathers. When it fails, we blame one single mother. Matanel, contrary to other institutions, can take risks.

Matanel with the blessing of CER created Hulya. Hulya is a social network of young European Rabbis, assisting them and providing them with the resources they need to invigorate their communities and attract new audience.

We helped creating 6 kinder gardens. The one of Voronezh has started in August and has a capacity of ??? children.

We helped building 5 Mikvaot, the last one will be in Nijmegen.

For several years now, we distribute each Hag Jewish items (all over Europe, more than 20,000 pieces). For example, each member Rabbi of Hulya is receiving free of charge 50 complete sets of Hanoukiots.

This year we printed Shironim with barcode of children songs.

They will be delivered only tomorrow, otherwise you would have taken a sample with you.

We will have Haggada also with barcode songs.

We helped for organising more than 20 shabbatonim this year. Two times a year, we organize seminar for young Rabbis.

The last one in Prague brought 30 Rabbis from all over Europe and the topic was the media where each Rabbi had to present a work to the others.

It was very interesting and refreshing to be surrounded by Rabbis who have faith in their role.

We have agreed with Rav Spinner to develop the seminar for Rabbis of Europe (and not only for Germany) as well as a seminar for Rebbetzin, which started this year. We need several Rav Spinner. What he is doing is amazing and corresponds to our way of thinking and acting.

The requests of young Rabbis exceed the resources allocated by Matanel. We can multiply the actions, and we wish to do it.

Help us to help you better.

Some Rabbis wanted to help and they abandoned us. Please come back.

The future of Judaism needs the help of all in joined and concerted actions.

I acknowledge even though I know it was hard, you started to discuss about the problems that orthodox women are confronted to.

Future of Judaism of Europe relies on the future of the Rabbinat of Europe.  
Most of the young Rabbanim are good, we have to strengthen them without politics.  
Toward their president, toward some specific situations with experienced Rabbis out of politics.

I thank you all for willing to stay Jew.

I thank you to pray for us.

I thank the political person to take proper positions when they are in charge and in control and have the power to do not only verbally.

Dear Friends,

You are all my dear friends (and forgive me I am unable to name each of the important guests of this evening, and on top of it in good order, without doing huge mistakes.)

So, you are my friends and my family. Being with friends and family allow me to say my truth.

I am a simple Jewish girl coming from Fez (Morocco) where Judaism was full of joy, full of traditions, full of love, tolerant, where women were sitting near their husband, where we were helping each other without checking how much observant the other was. Hospitality, family, warm dialog, education allowing all kind of lectures.

What happened to that Judaism?

Judaism which unites instead of divide. A warm and amicable Judaism where we can receive at home like we do in Luxembourg with my husband. Where we exchange ideas without rejecting.

Europe is facing either assimilation, either departure out of fear.

The Judaism of tomorrow relies on actual Rabbis or Rabbis to be (future Rabbis); they are the tool of transmission of Judaism.

What Judaism will be transmitted? Who will be the Rabbis of tomorrow?

They will be (and they already are) confronted to questions of society. We must help them write articles, speak in public, provide support or give answers to their congregants. All that with the collaboration of Dayanim on how to treat problems they are confronted to. Dayanim of Europe or Dayanim having the knowledge of Europe. The sphere of chief/ big/ great rabbis is too far from young rabbis and – sorry to say – it is something purely or mainly political.

Politics was the passion of the last decade for Rabbanim.

But, but, but...

During those two days of 28th Convention of CER, I watched, I listened, I walked through and I got the smell of success.

No doubt, I am comforted that CER is doing a good political job and has some success in the area or arena and with the help of the Almighty (the boss) CER will continue its path for causes which we have consensus on.

We are all for maintaining Brit Mila (it was a big/ small issue with Meziza and I must congratulate Pinchas Goldschmidt and the Dayanim to have taken position very quickly).

On that matter, we are all for allowing Chehita.

We are all for peace.

We are all united for big common causes, but the devil is in the details in small causes. The work to be done for maintaining (I am not speaking about developing) Judaism in Europe is tremendous.

Day to day, work on the fields is accomplished by most of you and you know what you are facing.

Matanel Foundation has understood it and being a small foundation. It has decided to focus on what I call “start up”: combination of good manager/ good ideas/ warm

Judaism/ ethic and factor of success.

When a battle is won, it has several fathers. When it fails, we blame one single mother.

Matanel, contrary to other institutions, can take risks.

Matanel with the blessing of CER created Hulya. Hulya is a social network of young European Rabbis, assisting them and providing them with the resources they need to invigorate their communities and attract new audience.

We helped creating 6 kinder gardens. The one of Voronezh has started in August and has a capacity of ??? children.

We helped building 5 Mikvaot, the last one will be in Nijmegen.

For several years now, we distribute each Hag Jewish items (all over Europe, more than 20,000 pieces). For example, each member Rabbi of Hulya is receiving free of charge 50 complete sets of Hanoukiots.

This year we printed Shironim with barcode of children songs.

They will be delivered only tomorrow, otherwise you would have taken a sample with you.

We will have Haggada also with barcode songs.

We helped for organising more than 20 shabbatonim this year. Two times a year, we organize seminar for young Rabbis.

The last one in Prague brought 30 Rabbis from all over Europe and the topic was the media where each Rabbi had to present a work to the others.

It was very interesting and refreshing to be surrounded by Rabbis who have faith in their role.

We have agreed with Rav Spinner to develop the seminar for Rabbis of Europe (and not only for Germany) as well as a seminar for Rebbetzin, which started this year.

We need several Rav Spinner. What he is doing is amazing and corresponds to our way of thinking and acting.

The requests of young Rabbis exceed the resources allocated by Matanel. We can multiply the actions, and we wish to do it.

Help us to help you better.

Some Rabbis wanted to help and they abandoned us. Please come back.

The future of Judaism needs the help of all in joined and concerted actions.

I acknowledge even though I know it was hard, you started to discuss about the problems that orthodox women are confronted to.

Future of Judaism of Europe relies on the future of the Rabbinat of Europe.

Most of the young Rabbanim are good, we have to strengthen them without politics.

Toward their president, toward some specific situations with experienced Rabbis out of politics.

I thank you all for willing to stay Jew.

I thank you to pray for us.

I thank the political person to take proper positions when they are in charge and in control and have the power to do not only verbally.

" ["format"]=> string(1) "1" ["safe"]=> string(5502) "

You are all my dear friends (and forgive me I am unable to name each of the important guests of this evening, and on top of it in good order, without doing huge mistakes.)

So, you are my friends and my family. Being with friends and family allow me to say my truth.

I am a simple Jewish girl coming from Fez (Morocco) where Judaism was full of joy, full of traditions, full of love, tolerant, where women were sitting near their husband, where we were helping each other without checking how much observant the other was. Hospitality, family, warm dialog, education allowing all kind of lectures.

What happened to that Judaism?

Judaism which unites instead of divide. A warm and amicable Judaism where we can

receive at home like we do in Luxembourg with my husband. Where we exchange ideas without rejecting.

Europe is facing either assimilation, either departure out of fear.

The Judaism of tomorrow relies on actual Rabbis or Rabbis to be (future Rabbis); they are the tool of transmission of Judaism.

What Judaism will be transmitted? Who will be the Rabbis of tomorrow?

They will be (and they already are) confronted to questions of society. We must help them write articles, speak in public, provide support or give answers to their congregants. All that with the collaboration of Dayanim on how to treat problems they are confronted to. Dayanim of Europe or Dayanim having the knowledge of Europe. The sphere of chief/ big/ great rabbis is too far from young rabbis and – sorry to say – it is something purely or mainly political.

Politic was the passion of the last decade for Rabbanim.

But, but, but...

During those two days of 28th Convention of CER, I watched, I listened, I walked through and I got the smell of success.

No doubt, I am comforted that CER is doing a good political job and has some success in the area or arena and with the help of the Almighty (the boss) CER will continue its path for causes which we have consensus on.

We are all for maintaining Brit Mila (it was a big/ small issue with Meziza and I must congratulate Pinchas Goldschmidt and the Dayanim to have taken position very quickly).

On that matter, we are all for allowing Chehita.

We are all for peace.

We are all united for big common causes, but the devil is in the details in small causes. The work to be done for maintaining (I am not speaking about developing) Judaism in Europe is tremendous.

Day to day, work on the fields is accomplished by most of you and you know what you are facing.

Matanel Foundation has understood it and being a small foundation. It has decided to focus on what I call “start up”: combination of good manager/ good ideas/ warm Judaism/ ethic and factor of success.

When a battle is won, it has several fathers. When it fails, we blame one single mother.

Matanel, contrary to other institutions, can take risks.

Matanel with the blessing of CER created Hulya. Hulya is a social network of young European Rabbis, assisting them and providing them with the resources they need to invigorate their communities and attract new audience.

We helped creating 6 kinder gardens. The one of Voronezh has started in August and has a capacity of ??? children.

We helped building 5 Mikvaot, the last one will be in Nijmegen.

For several years now, we distribute each Hag Jewish items (all over Europe, more than 20,000 pieces). For example, each member Rabbi of Hulya is receiving free of charge 50 complete sets of Hanoukiots.

This year we printed Shironim with barcode of children songs.

They will be delivered only tomorrow, otherwise you would have taken a sample with you.

We will have Haggada also with barcode songs.

We helped for organising more than 20 shabbatonim this year. Two times a year, we organize seminar for young Rabbis.

The last one in Prague brought 30 Rabbis from all over Europe and the topic was the media where each Rabbi had to present a work to the others.

It was very interesting and refreshing to be surrounded by Rabbis who have faith in their role.

We have agreed with Rav Spinner to develop the seminar for Rabbis of Europe (and not only for Germany) as well as a seminar for Rebbetzin, which started this year.

We need several Rav Spinner. What he is doing is amazing and corresponds to our way of thinking and acting.

The requests of young Rabbis exceed the resources allocated by Matanel. We can multiply the actions, and we wish to do it.

Help us to help you better.

Some Rabbis wanted to help and they abandoned us. Please come back.

The future of Judaism needs the help of all in joined and concerted actions.

I acknowledge even though I know it was hard, you started to discuss about the problems that orthodox women are confronted to.

Future of Judaism of Europe relies on the future of the Rabbinate of Europe.

Most of the young Rabbanim are good, we have to strengthen them without politics.

Toward their president, toward some specific situations with experienced Rabbis out of politics.

I thank you all for willing to stay Jew.

I thank you to pray for us.

I thank the political person to take proper positions when they are in charge and in control and have the power to do not only verbally.
